

DASTAGIR MACHINES - Precision Engineering

Precision is the pinnacle of Engineering; Dastagir Machines has mastered the art precisely while maturing in the Tobacco industry for the past few decades. Having served for almost 3 generations, we now pioneer commendable solutions for Tobacco and related companies.

Dastagir Machines is currently engaged in manufacturing, servicing, overhauling, rebuilding & sales of Cigarette manufacturing machines and its spares. Backed with robust infrastructure and highly skilled teams, we are able to provide products & services on par with International Standards. We are the foremost choice of industry leaders.

Our ethos involves on time delivery of quality products and services. Not only we provide competitive edge to our customers, we act as a catalyst in attaining their goals.

Our **Mission** is to provide products & services of highest quality by ensuring precision in every aspect.

Our **Vision** is to become the most valued business partner of our customer for their business needs

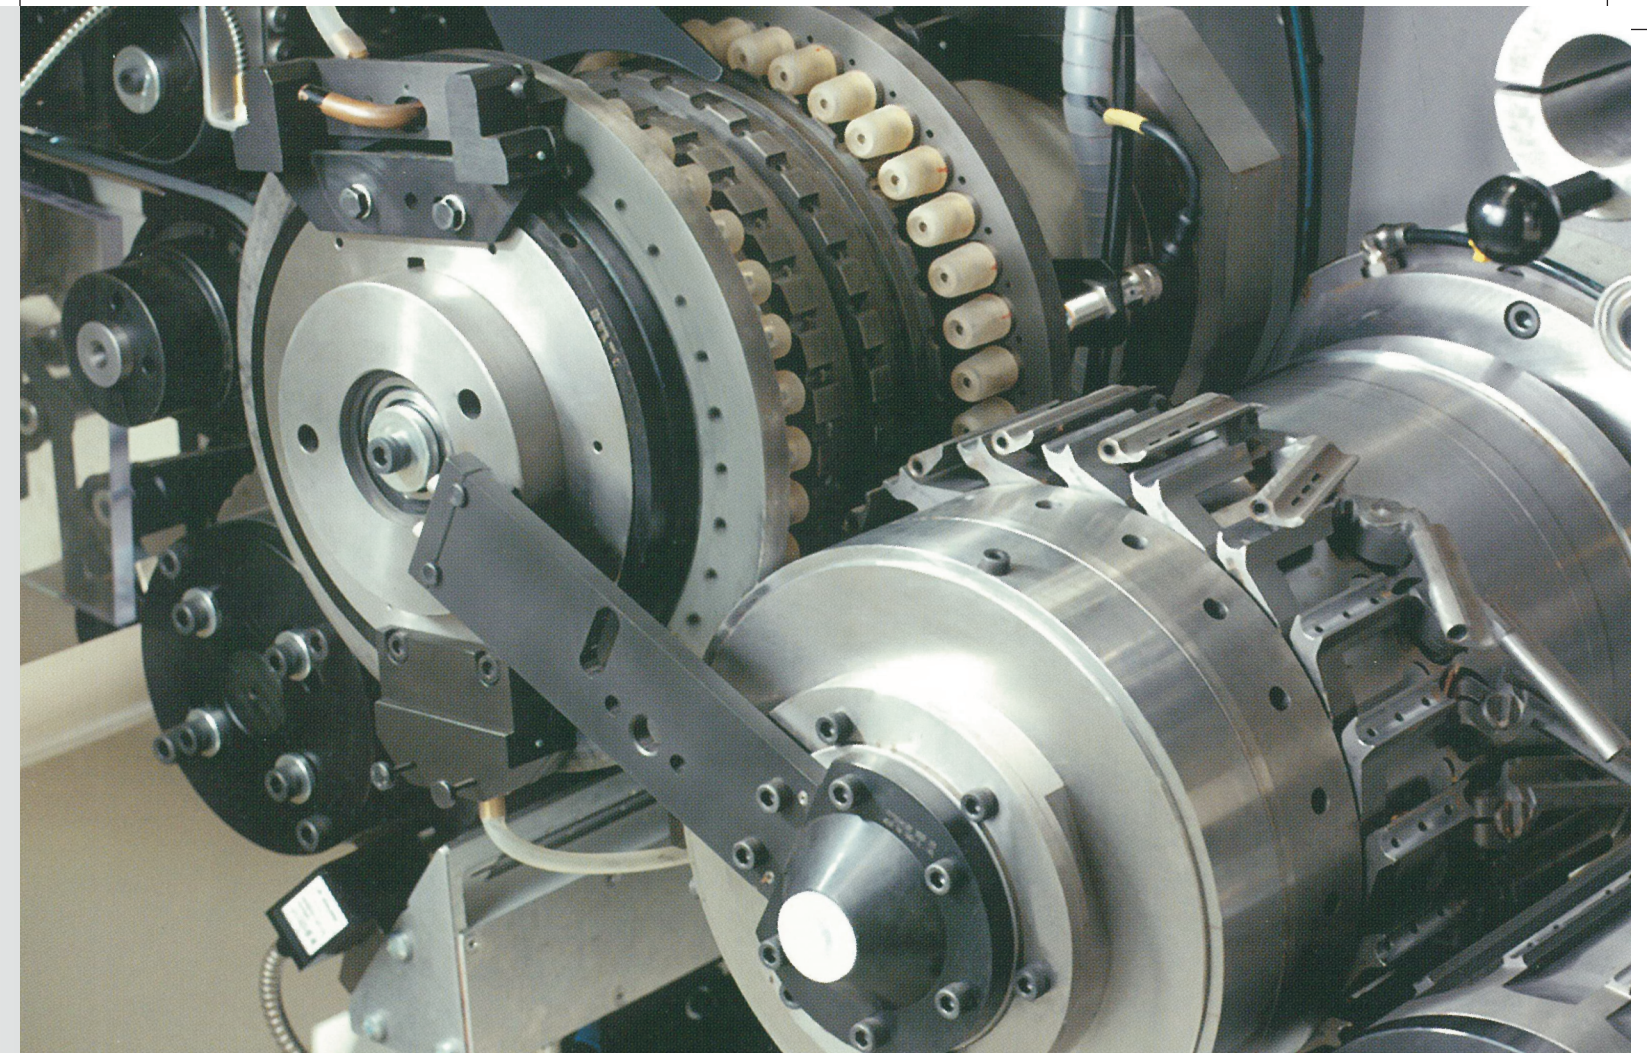

Delivering value to customer is beyond just delivering quality products and services. We understand the business needs of our customers and encapsulate our goals around them. We strongly believe in retaining customers and earning their respect and loyalty.

Our commitment to precision in every aspect ensure enchanting quality products.

At the crux, our policy is to meet and exceed customer's satisfaction. Our approach is to consistently upgrade the technology that enables us to provide unmatched products and services. This enables us to educate the customer in making a tailor made solutions unique to each client.

Our objective is to deliver world class products to our customers, on time. Economize the production cost. Improve the system of planning and scheduling to comply with customer requirements.

Our commitment to quality has set us on the path to earning an **ISO 9001 Certification**.

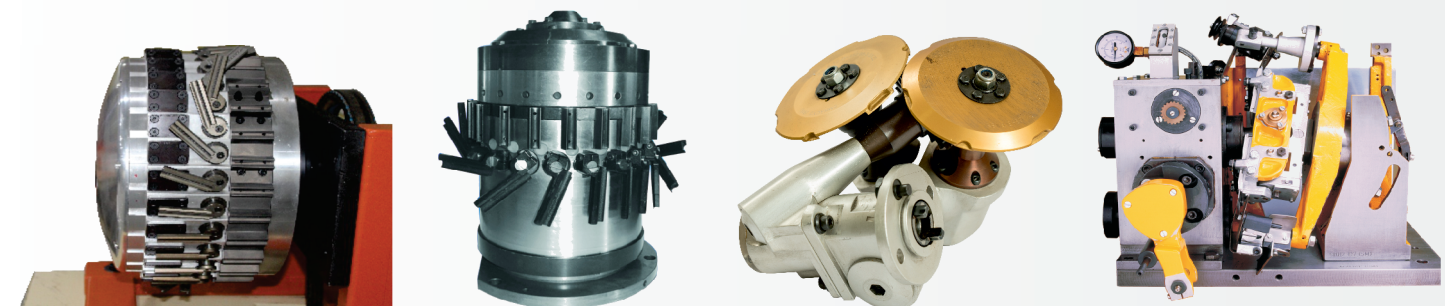

The best in range Assemblies and Sub-Assemblies

Tobacco industry is ever evolving and technologically demanding than it was ever before. The needs for each type of cigarette has become more diverse and adhering to global standards for quality while evolving is challenging. Our years of experience and technically superior team and infrastructure enable us to overcome the hurdles.

We provide industry standard spare parts at minimalistic price. We are able to do so because we have in-house manufacturing and does not require to outsource any operation.

We bring world class assemblies to help produce high quality cigarettes.

MK - 8 / MAX - 3

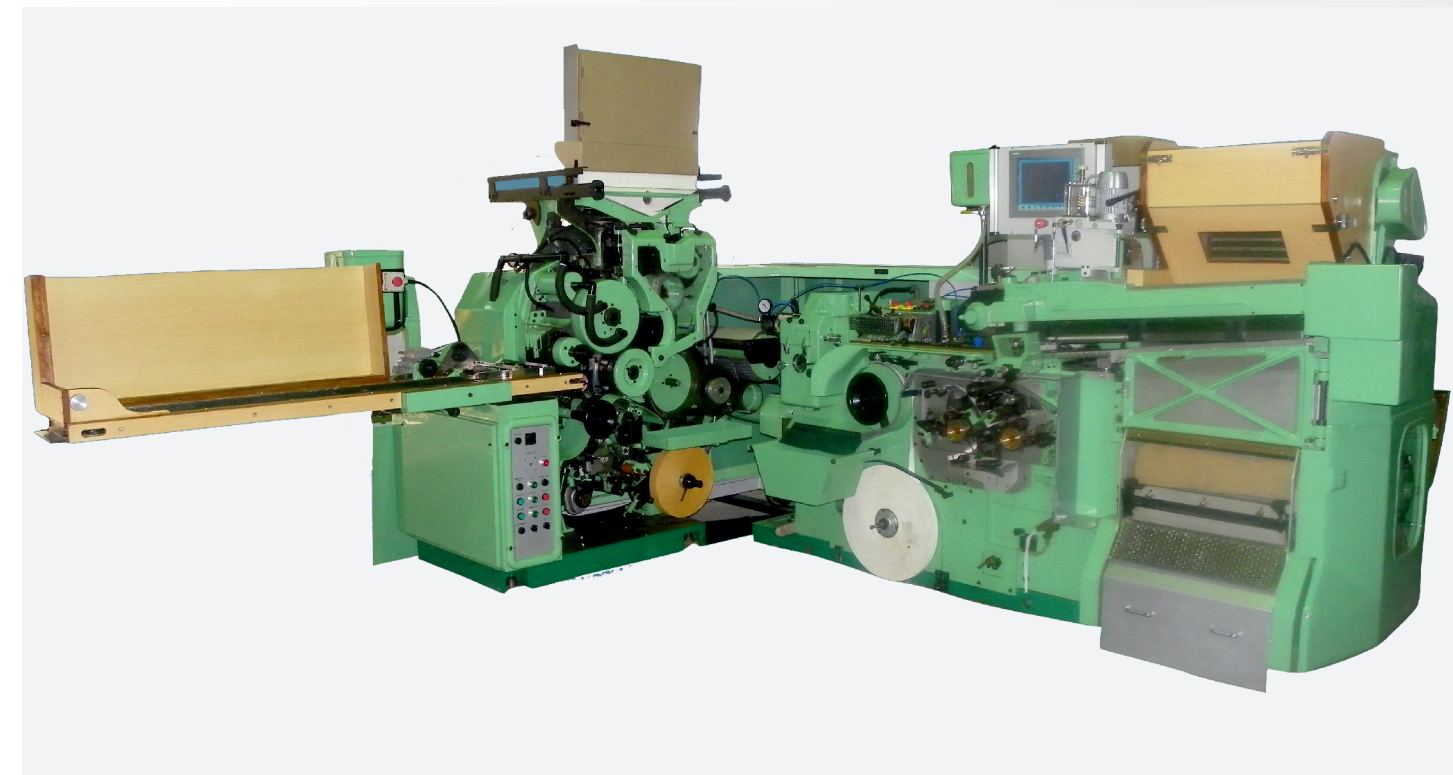

Conversion Setups

Conversion kits enable manufacturing of cigarettes of different dimensions such as length, thickness and varying bud sizes on a single Cigarette machine. It includes changes in drum size and other important parts.

As old as the industry gets, it has never stopped to astonish us with enticing types of cigarettes which demands advancements in technological upgrades. We are steadily confronting the market needs and augmenting our infrastructure so our customer can concentrate on their business while we take care of their technical capabilities.

We offer conversion kits for size change and layout modification.

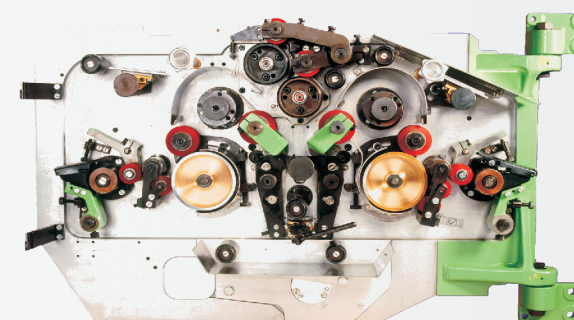

We do variation in cigarette size, including slim and super slim and also change in cigarette or filter length.

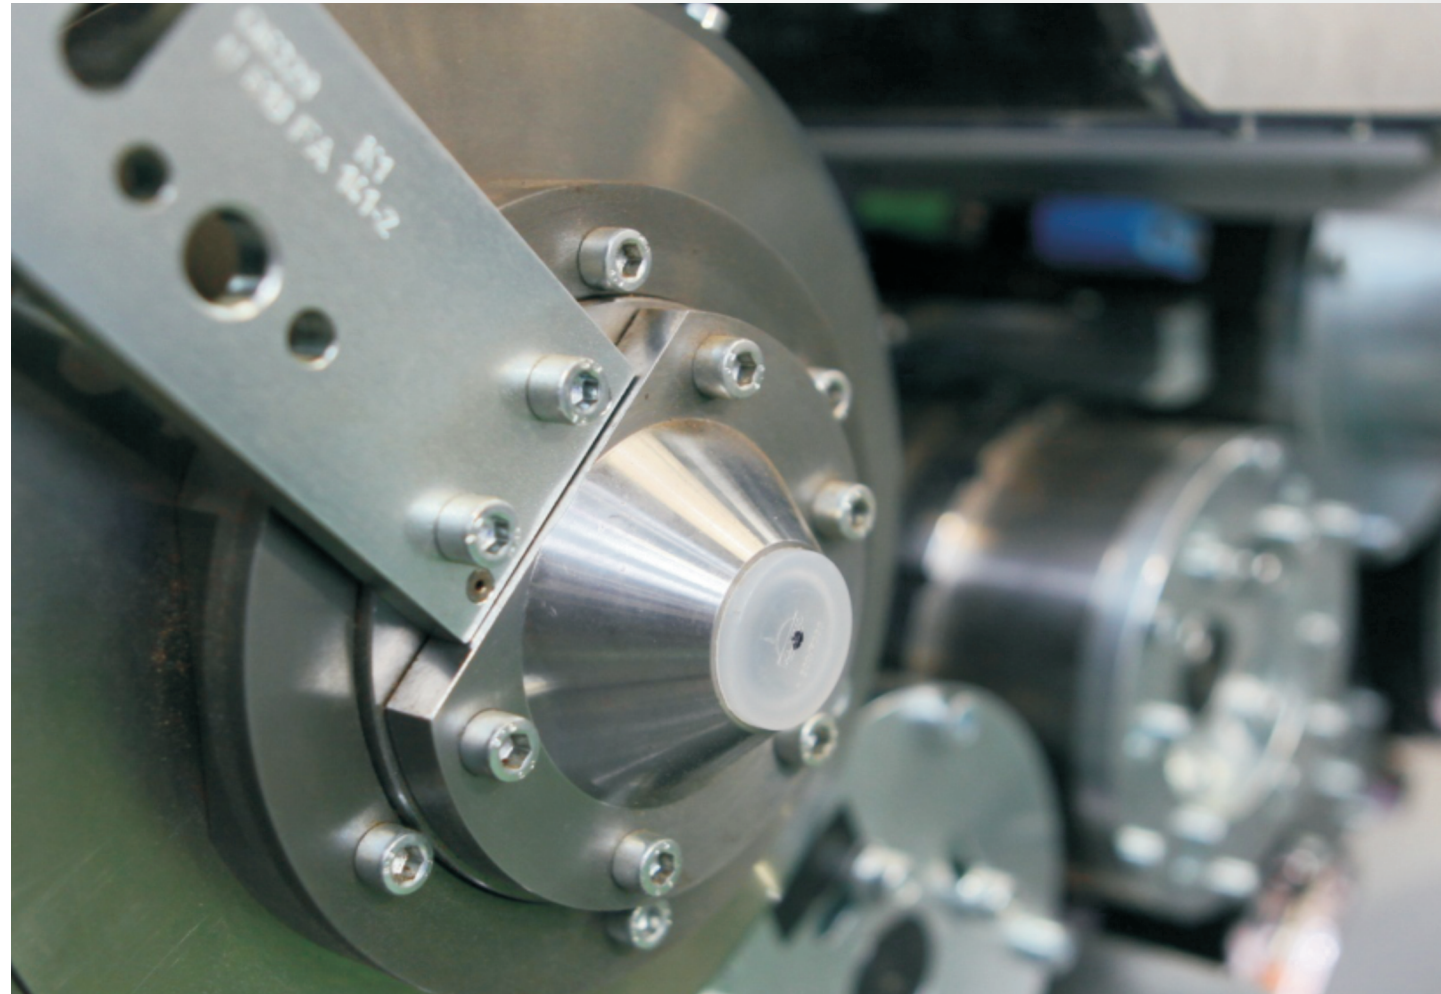

Mark 8 - upto 3000 CPM

Conforming to international standards of the likes of Molins and Decoufle, we manufacture Cigarette making machines with speed varying between 3000 to 7000 cigarettes per minute. This includes Makers, Max and high speed wrappers.

A cost effective, efficient machines such as Mark 8 / Max 3 enables production of 3000 Cigarettes per minute without the need of technically advanced or sophisticated operators. This also means a quicker change in brand and increased reliability and durability.

Spare Parts

To complement our wide range of manufacturing, we supply spare parts too. Our unique production system makes a variety of high quality products. We also supply spares of leading cigarette making machines.

Our spare parts are durable and precise in nature. Quality and best operational performance are the key characteristic of our spare parts. Our investment in relevant technologies has yielded excellent result in quality enhancement and manufacturing efficiency. Thus enabling us to assert that these parts are guaranteed to perform under the most demanding conditions.

Rebuilding

Precision at every step

Rebuilding involves renewing of machines. Most customers prefer certain make of a machine for their durability and thus require overhauling.

We perform off-site overhauling of the machines pre-owned by our clients.

Our dedicated team with several decades of experience in the field have evolved an excellent approach for this activity. The machines are completely overhauled, mechanically, electrically, pneumatically and refurbished to the standards of a new machine in terms of quality and performance.

We have overhauled dozens of machines so far and our customers are delighted with this economic solution.
